

## DESIGN FEATURES:

- The building is square with porticos on each of its four sides, the focal point of the composition being a rotunda or cupola, giving a feeling of light and airiness to the library
- The sloped roofs and cupola assure that the library has a residential feeling, yet with enough height and presence to make it a landmark in the community
- Design is characterized by open flexible space with good light and an open and inviting ambience
- The community spaces of the building have been designed to be able to be used independently of the library.
- Accessibility features (AODA compliant)

## ABOUT THE ANSLEY GROVE LIBRARY:

- Constructed in 1990 as a stand-alone structure. Chancellor Community Centre added in 1998 adjacent to the library, incorporating it as part of the building.
- Interior upgrades in 2002, 2003, 2008
- Renovations & refurbishment in 2014
- 1 program/meeting room with capacity for 60 people theatre style seating; has movable dividing door to create 2 smaller rooms
- 2 study rooms
- Designated children's room
- Collection contains approximately 54,300 items
- Self-checkout for library materials
