Create a Spider Web

This spider web might be a little messy to make but it does make for a great Halloween decoration!

Supplies Needed:
- Yarn (white)
- School Glue
- Bowl
- Plastic Spiders
- Balloon

Directions:
1. Blow up a balloon. Your spider web will be as little or as large as you blow up the balloon.

2. Pour approximately ½ cup of glue into a bowl.

3. Cut a very long piece of yarn that would be large enough to wrap around the balloon many times to make it look like a web. You also can do many smaller pieces (2 feet in length) to make it a bit easier.

4. Put the yarn into the bowl of glue and mix it.

5. Wrap the yarn around the balloon to make it look like a spider web. The more wraps you do, the stronger it will be.

6. Once the balloon is covered in yarn, take one more piece of yarn (approximately 1/2 foot) and tie it to the end of the balloon. Hang the balloon to dry overnight.

7. In the morning, pop the balloon and remove it from the centre of the balloon.

8. Glue spiders onto the balloon. Let dry.
