

# Halloween Sensory Bags

*Sensory bags are a great way for little ones still in the mouthing stage to have a safe sensory experience through touch. They can squeeze, squish, poke, pat, and slide their hands over the bag. But these Halloween sensory bags aren't just for babies! Set them out for a Halloween party, play date, or school party for safe, mess-free play.*

## Supplies Needed:

- Clear hair gel
- Large Ziploc baggie
- Halloween toys (squishy eyeballs, worms, bats, snakes, etc.)
- Orange food colouring

## Directions:

1. Place all the hair gel in the baggie and add about 10 drops of food coloring. Zip baggie closed and squish the gel around to mix in the food coloring.
2. Open the bag back up and place all the Halloween toys inside and zip closed.
3. Optional: Tape the top of the bag closed to make it leak-proof.
