

Toothpick and Candy Towers

Build a toothpick and candy tower. How tall will yours be?

Supplies Needed:

- Candy Pumpkins or Candy Corn
- Toothpicks
- Ruler

NOTE: Please be careful when building with the toothpicks because they are pointy!

Directions:

1. Start by inserting a toothpick into a candy pumpkin or candy corn and then add another candy on the toothpick's other side.
2. Build your base. To build a strong base, continue adding toothpicks and candy. Will you try a triangle or square base for the structure? Which will be stronger?
3. Now it's time to build up!
4. Once your structure is finished, measure the highest point of each to see whose toothpick tower is tallest. The structure should stand for a minimum of 30 seconds once it's been completed.
5. Good luck and have fun!
